

DH-CHS4106-4ET

6-Port Cloud Managed Hardened Switch

System Overview

The Hardened Cloud Managed Switch series is a state-of-the-art device that can effortlessly turn on and off its managed mode with the simple flip of a switch. When managed mode is enabled, local network management and cloud management are seamlessly integrated. For cloud management, you can perform operation and maintenance using topology visualization for front-end devices, transmission, and back-end storage devices within both security systems and IT system. The switch features a high-performance switch engine and large cache, ensuring smooth transmission of video streams. With its full metal and fanless design, it has great heat dissipation and can operate in harsh environments. It also offers EMC and has protection against overvoltage, overcurrent, static electricity, lightning strikes, pulses and other types of interference. This makes it suitable for scenes such as homes, factories, and offices.

Functions

Managed Mode ON/OFF

Easily switches between managed and unmanaged mode with just the flip of a switch. When in managed mode, you can perform management through the webpage locally or the cloud platform. This allows the device to seamlessly adapt to a variety of scenes.

- · Features managed mode.
- Complies with IEEE802.3, IEEE802.3u, IEEE802.3x, IEEE802.3ab and IEEE802.3z standards.
- · Supports network topology visualization.
- · Supports mobile management by app.
- · Supports one-stop maintenance.
- With its full metal design and dust-proof enclosure, it can be used in a wide range of temperatures.
- · Supports desktop mount and DIN rail mount.

Cloud Management

Devices can be managed through the DoLynk Care app and performs real-time monitoring of the network. The app also displays the status of devices, triggers alarms for errors in real time and sends notifications.

Network Topology Management

Supports the LLDP protocol and is able to generate and display the network topology, so that you can quickly identify issues, and perform operation and maintenance remotely on devices that are in the topology.

Loop Protection

When a loop is detected, the loop alarm will be triggered and the elimination mechanism will activate to prevent broadcast storms from occurring.

Scene

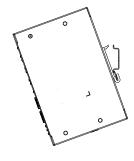

Suitable for use both indoors and outdoors such as in corridors, factories, and parks.

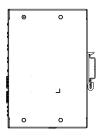

Basic Layer	Specification		
Switching Capacity Packet Forwarding Rate 3.57 Mpps Description of Function Port 1.4: 4 × RI-45 10/100 Mbps Port 5: 1 × SFP 1000 Mbps (uplink) Port 6: 1 × SFP 1000 Mbps (uplink) Operating Temperature -30 °C to +65 °C (-22 °F to +149 °F) Operating Humidity 10%-90% (RH), non-condensing Protection P30;IK06 Storage Temperature -40 °C to +85 °C (-40 °F to +185 °F) Storage Humidity 5%-95% (RH), non-condensing Power Supply External dual power supply (terminal block and DC): 12 VDC, 1 A Idling: 1.2 W Full load: 2.6 W Statics Protection Air discharge: 8 kV Contact discharge: 6 kV Contact discharge: 6 kV Common mode: 4 kV Differential mode: 2 kV Net Weight O.32 kg (0.71 lb) Gross Weight O.58 kg (1.28 lb) Product Dimensions 154.3 mm × 110.4 mm × 30 mm (6.07" × 4.35" × 1.18") (L W × H) Packaging Dimensions 299 mm × 164 mm × 72 mm (11.77" × 6.46" × 2.83") (L W × H) Casing Material Iron Installation DIN rail mount; desktop mount Certifications CE POE No Hardware Managed mode: Switches between managed and unmanaged mrad cloud management.
